Glow-worms

I never tire of exploring the rugged coastline near our holiday cottage. The cottage is very close to the mouth of the river. The riverbank is only ten metres away and it’s a very short walk to the beach.

Late one night, I paddled my canoe down the river towards the ocean. The sensation of floating in total darkness was quite amazing. I drifted towards the river mouth until I felt the rise and fall of unseen swells and the swirling currents as the fresh water of the river mixed with the salt water of the sea. Far away, on the horizon, lightning flashed from time to time. I continued paddling and found myself inside a deep cave in one of the cliffs adjacent to the river (it was high tide so the cave was flooded) and suddenly I was underneath a galaxy of glow-worms.

I paddled in for about 30 metres. The cave was so narrow that I couldn’t hold the paddle horizontally as it jammed between the walls. All the while I followed a strip of light made by thousands of glow-worms high up on the ceiling. About halfway along, the water became too shallow to continue paddling so I pulled the canoe up onto the sandy floor and picked my way along a narrow passageway for another 30 metres. Here the roof was so low that I had to crouch down to get through, but on the other side it opened up into a huge ‘room’ that was packed with many more thousands of glow-worms. I was mesmerised. They shone like tiny blue-green lanterns high above me, the glow so bright that I was able to make out my immediate surroundings. I stood staring around me, transfixed by their brilliance.
